

**EPICURUS**

Developed by  ITG

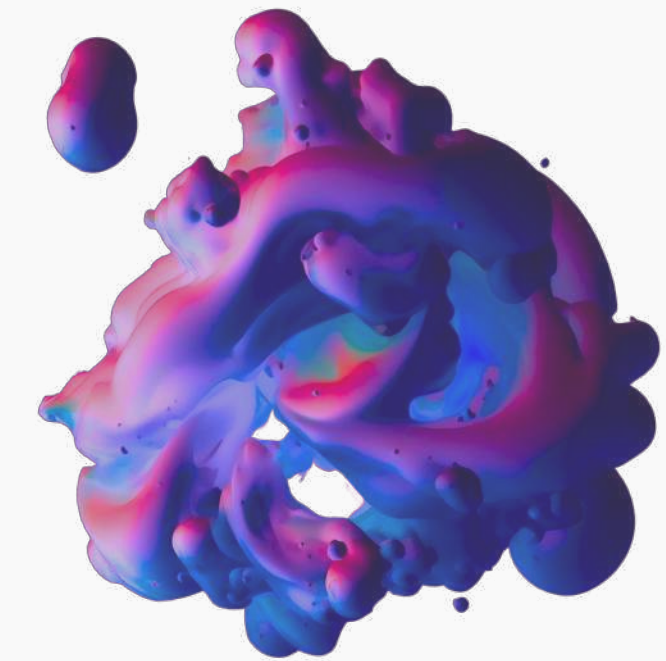

## Let's imagine: We have a problem

Investing in cryptocurrency is high-risk and complex in understanding a classical investor.

Today, we see a development trend of investment products related to digital assets. Therefore, work on their improvement and maximum compliance with security requirements is a priority for the near future.

There are hundreds of platforms in the classical investment market, while there is virtually no model of sustainable and profitable investment in the market of investment in digital assets.

## What is EPICURUS?

A multifunctional Web3 platform for investing in digital assets. It provides reliable tools to increase your financial success.

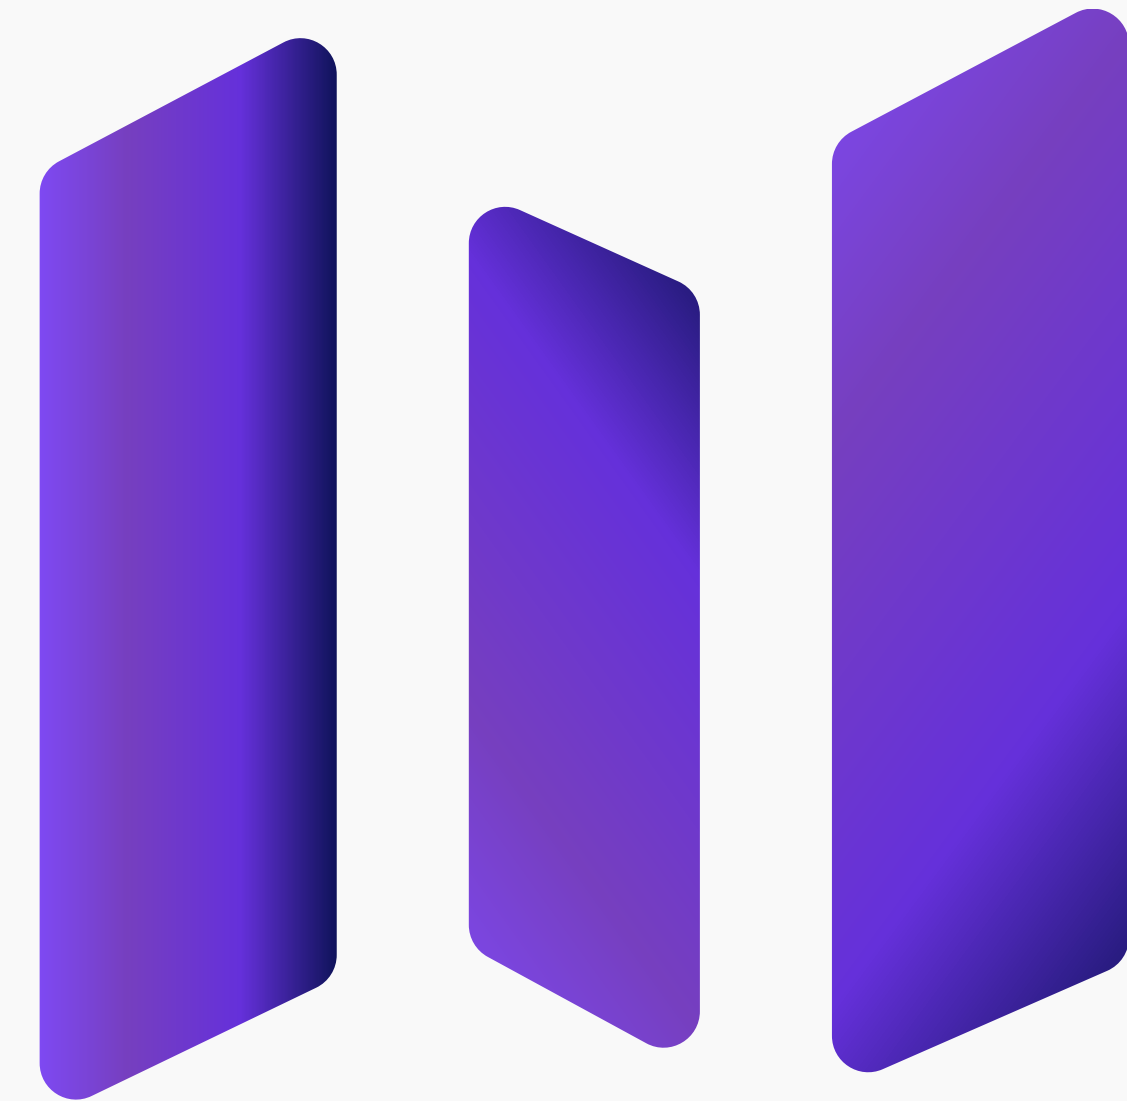

## Uniqueness

Our platform is unique due to its security, Ricardian smart contracts and innovative ecosystem based on an advanced CRM/BPM product.

## Invest in us

ITG has five years of high-yield trading and digital asset management. By investing in us, you choose experience and reliability.

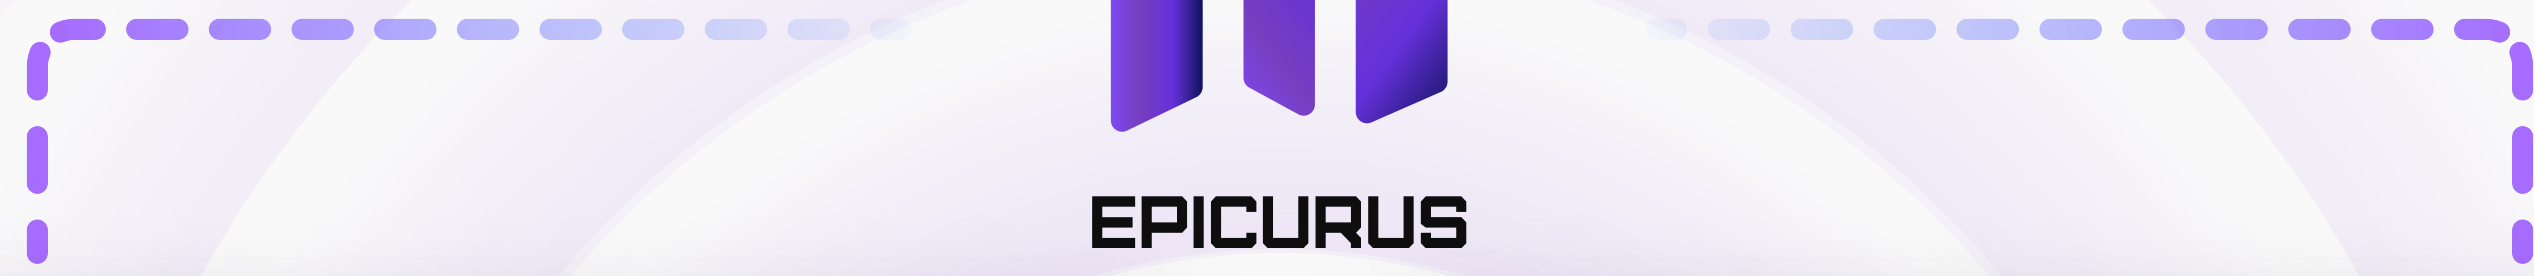

# EPICURUS

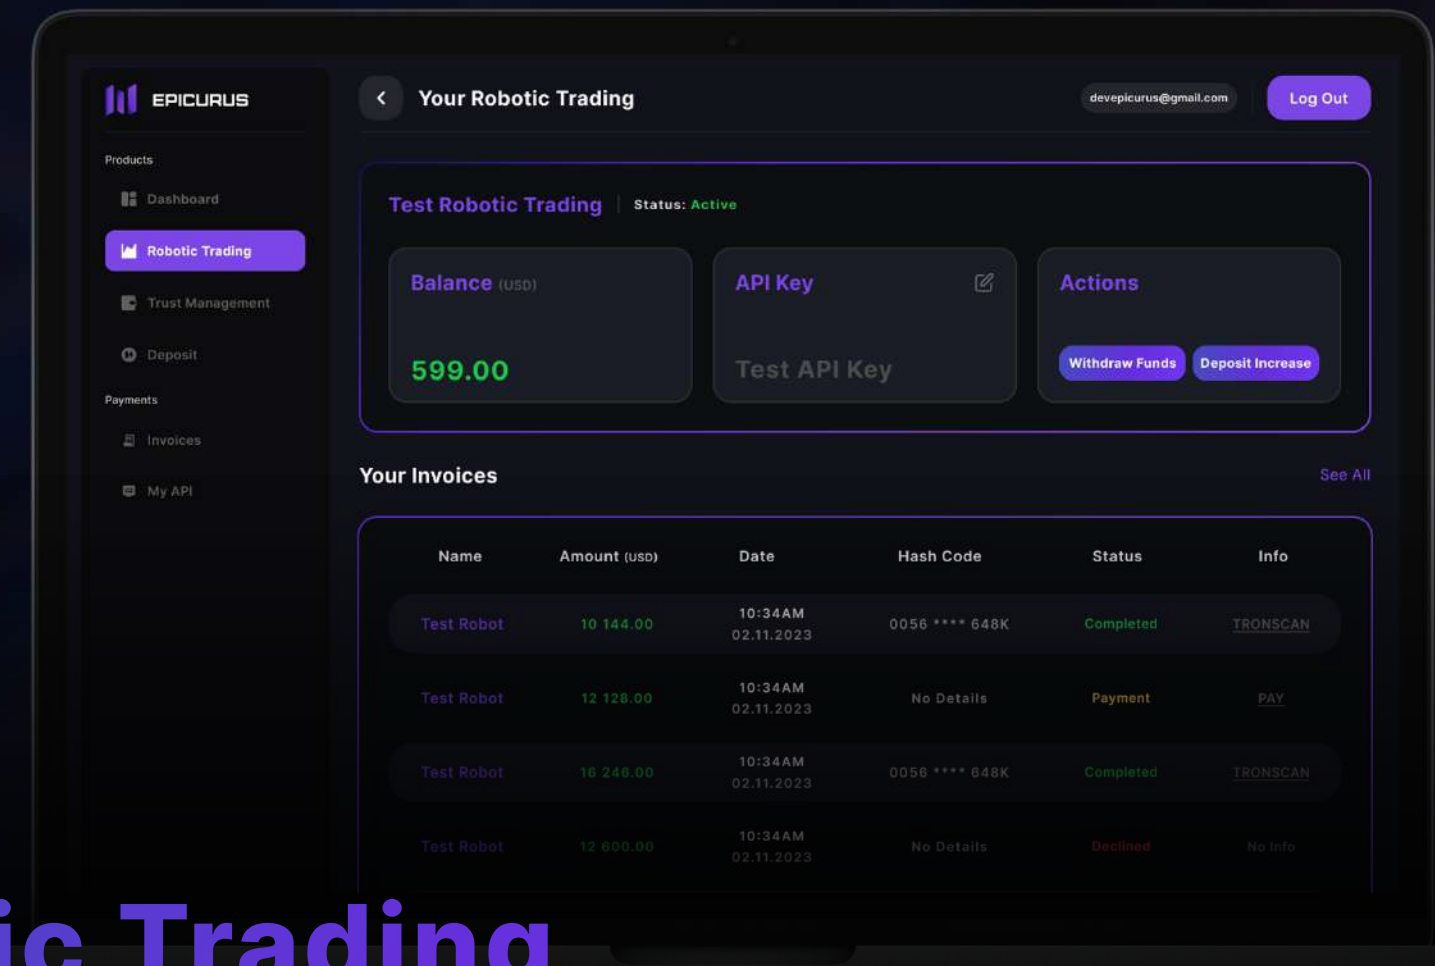

# EPICURUS

Provides secure investment solutions  
and an innovative academy to develop  
skills in digital assets.

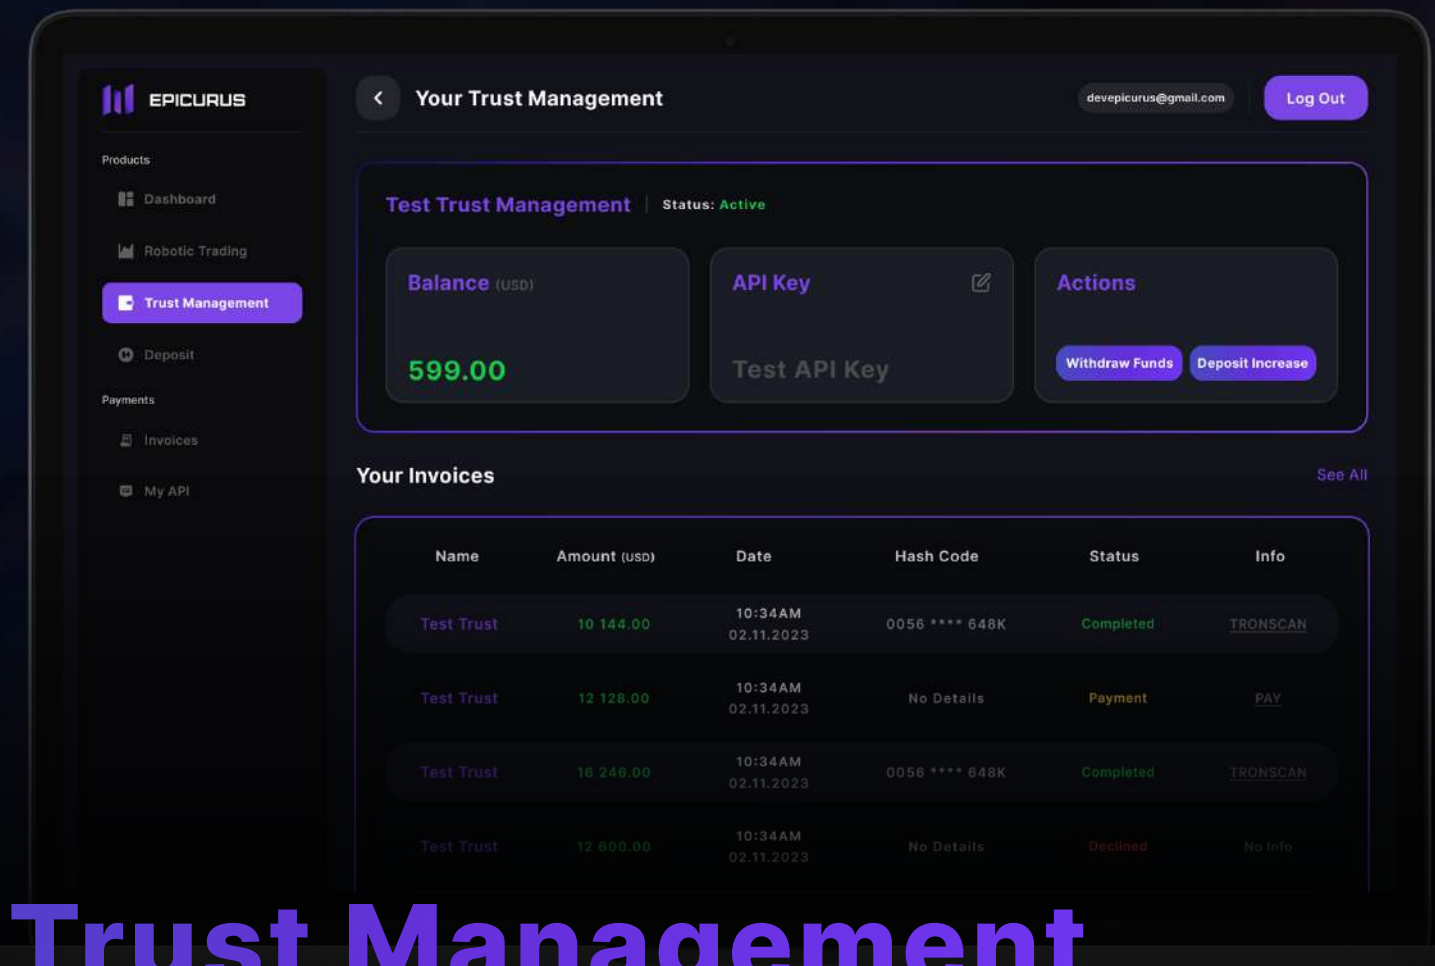

# What is Robotic Trading

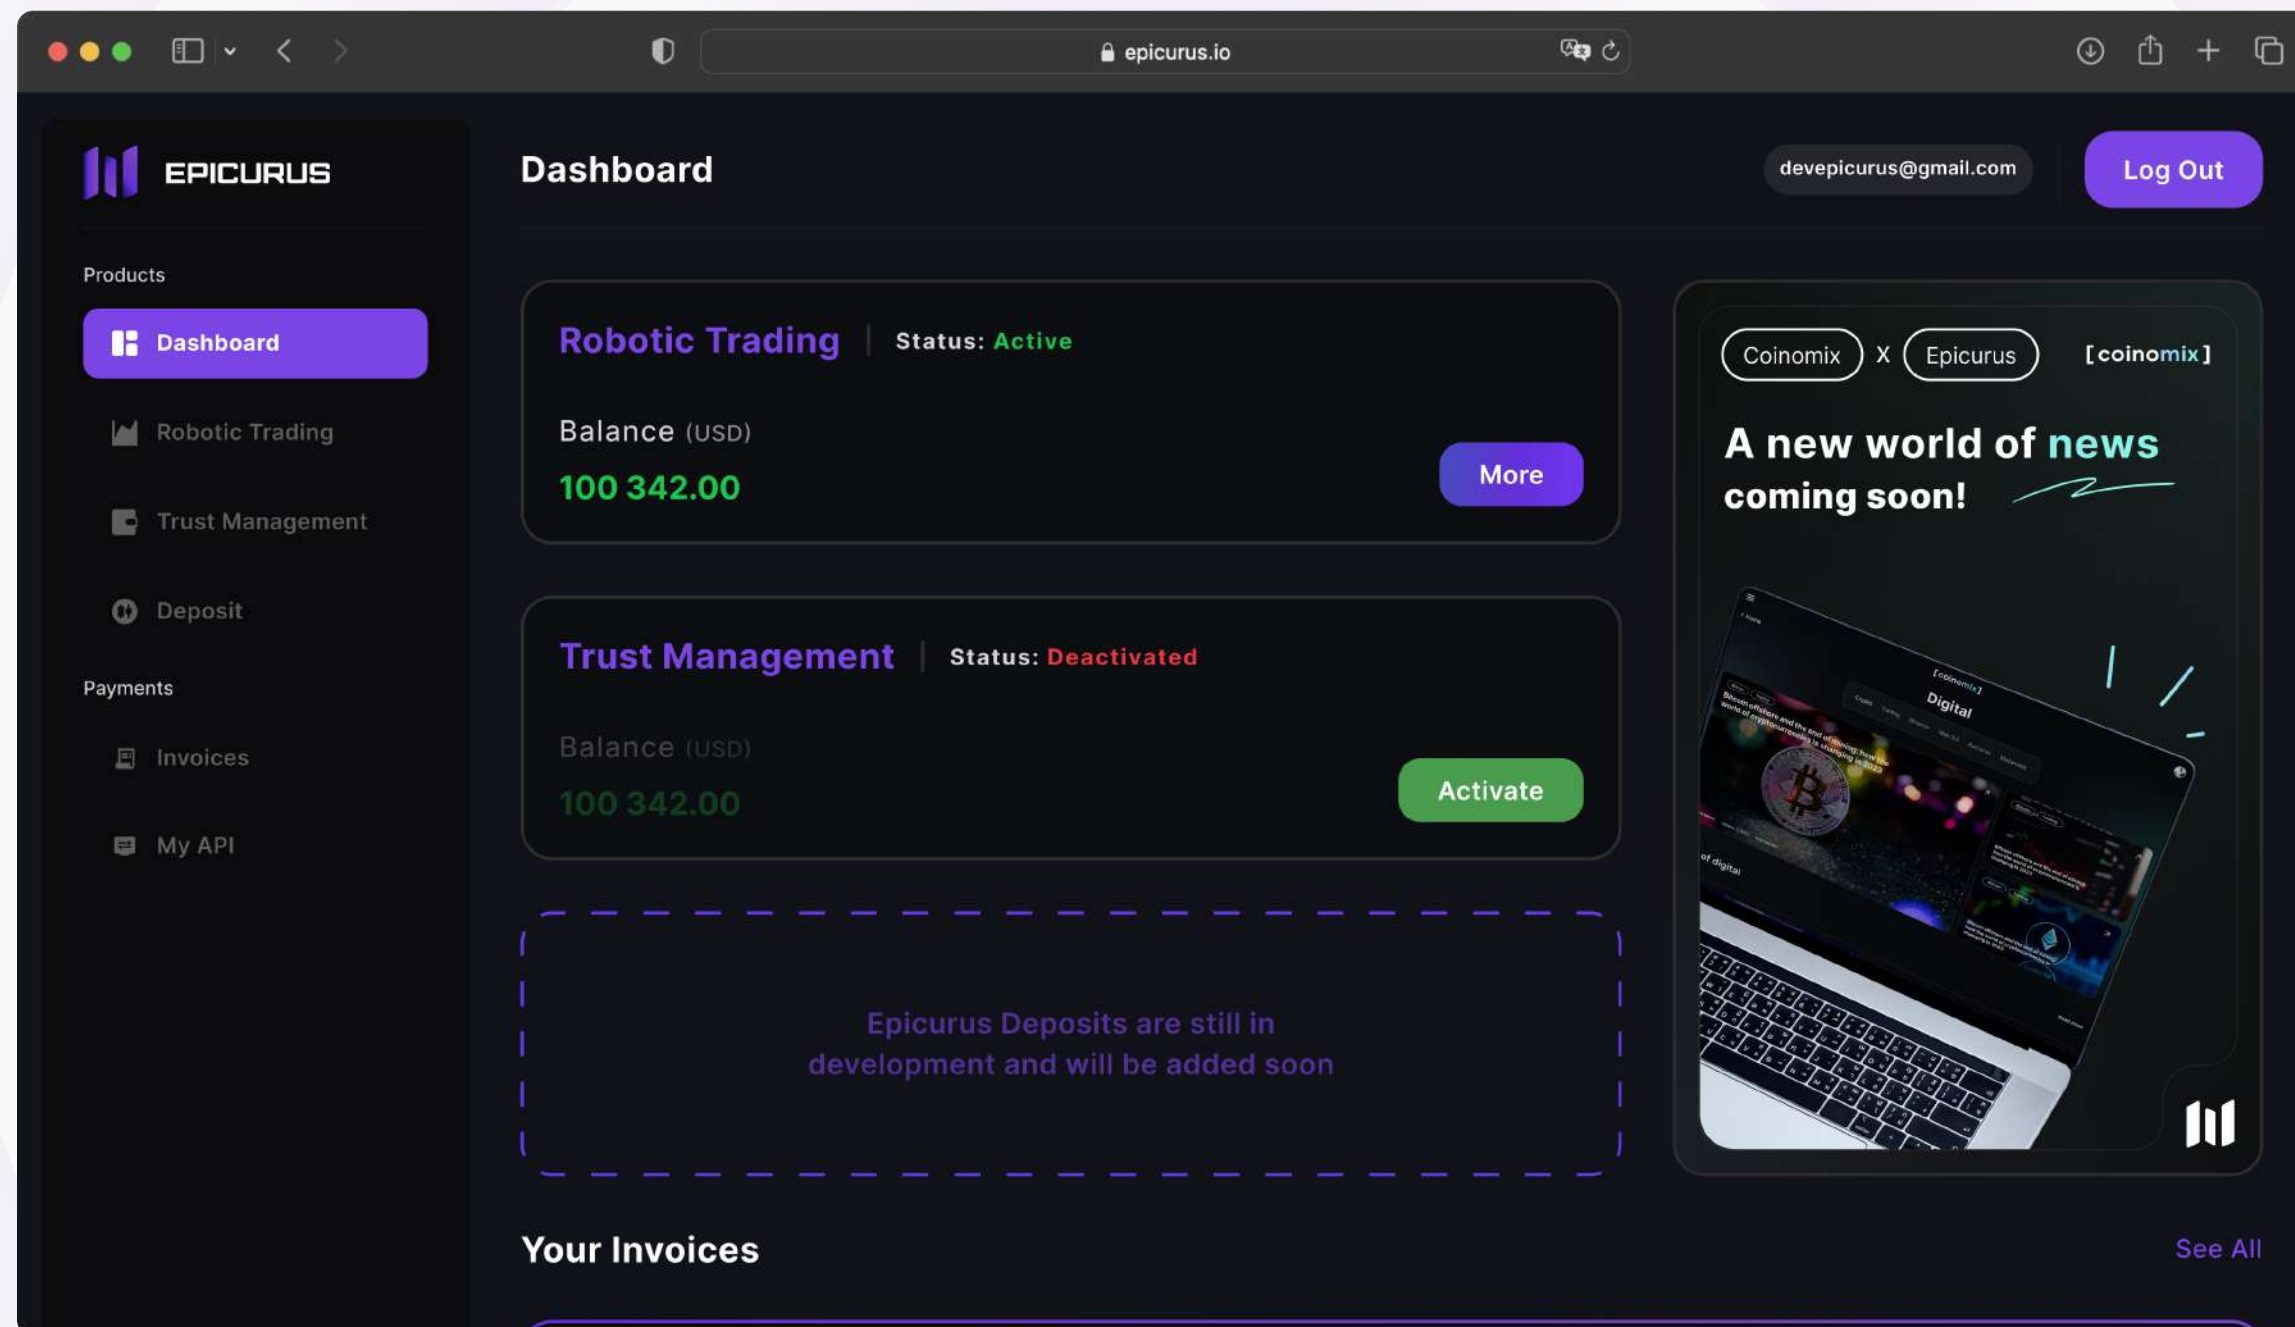

Service for automated digital assets trading on centralised or decentralised exchanges. Robotic Trading allows an investor to subscribe to one or more bots that autonomously, without investor participation, trade based on algorithmic strategies.

# What is Asset Trust Management

The investor transfers his assets to the trust management of the investment service provider, International Trade Group. The client's personal investment advisor trades on digital asset markets from the investor's account.

## Deposits

- Analogue of a traditional bank deposit in cryptocurrency.
- Transfers digital assets for a certain period.
- Regular payment of fixed interest.

## Trust Management

- Trust management of the investment service provider.
- Trade from the investor's stock exchange account.
- Personal advisor carries out the management.
- All assets remain the investor's property.

## Robotic Trading

- Service for automated digital assets trading.
- Subscribe to one or more bots.
- Trade based on algorithmic strategies.
- No investor participation.

# A platform built on our own experience

ITG specialises in analytics, trading, and developing  
Web 2.0 and Web 3.0 solutions.

- ① 5 years in the digital asset market.
- ① 4 blockchain projects.
- ① 500+ investor portfolios worldwide.
